Perinatal Case Management

Chapter 600: Special Conditions of Participation

601. Definition of Services

Perinatal Case Management (PCM) services are available to assist the eligible pregnant woman in gaining access to needed medical, nutritional, social, psychosocial, educational and other services in order to: improve maternal and infant health outcomes; encourage the use of cost-effective medical care through referrals to appropriate providers; and discourage over-utilization of costly services. Perinatal Case Management services are available to Medicaid eligible women during the prenatal and postpartum periods. These services may begin at the time of the presumptive eligibility determination for the pregnant woman, at the time of enrollment into one of Georgia's Medicaid care management organizations (CMOs), or following the referral by the woman's licensed obstetric or primary care provider who has identified her as being at risk for an adverse birth outcome. Women eligible for PCM services have free choice of any qualified Medicaid-enrolled PCM provider and free choice of other Medicaid- enrolled medical care providers within the State.

602. Enrollment

Current enrollment is open to an individual or group qualified to provide perinatal case management services and eligible to enroll as a Medicaid provider under this program. An inpatient healthcare facility is not eligible to enroll as a perinatal case management provider. A signed copy of the applicable license (s) must be submitted with the provider's application for enrollment. Please see Chapter 100, Section 105 of the Part I Policies and Procedures for Medicaid/ PeachCare For Kids manual for detailed information about provider enrollment.

Independent licensed registered nurses are not eligible to enroll as Perinatal Case Management providers under this program. Only Perinatal Case Management program enrolled providers are allowed to bill for case management services under this program.

603. Special Conditions of Participation

603.1. The Perinatal Case Management provider must be Medicaid enrolled:

603.1.1. GA licensed physician

603.1.2. Physician's Assistant working under the direction of a licensed physician

603.1.3. Nurse Practitioner

603.1.4. Certified Nurse-Midwife

603.1.5. Entity that employs or arranges for registered nurses to furnish the perinatal case management services such as a local public health agency. Inpatient healthcare facilities may not serve as Perinatal Case Management providers.

603.2. Every perinatal case management provider must be or utilize a Perinatal Case Manager to deliver the perinatal case management services.

- 603.2.1. The Perinatal Case Manager must:
 - 603.2.1.1. Have the capacity to provide the full range of perinatal case management services;
 - 603.2.1.2. Have demonstrated, direct experience in the delivery of health services to women such as providing primary care, prenatal care, family planning, or case management services; and
 - 603.2.1.3. Have demonstrated the ability to provide or coordinate pregnancy-related health and human services.
- 603.2.2. The Perinatal Case Manager may be a:
 - 603.2.2.1. GA licensed physician
 - 603.2.2.2. Physician's Assistant working under the direction of a licensed physician
 - 603.2.2.3. Nurse Practitioner
 - 603.2.2.4. Certified Nurse-Midwife
 - 603.2.2.5. GA licensed registered nurse who is employed or contracted with a Perinatal Case Management provider
- 603.2.3. The Perinatal Case Manager must:
 - 603.2.3.1. Have an unrestricted license to practice in the state of Georgia.
 - 603.2.3.2. Have a minimum of one-year direct experience in the delivery of perinatal services and coordination of care. This experience must have been acquired within the previous five years. Appendix B is required
 - 603.2.3.3. Have documented evidence of program orientation, training, and competency evaluation.
 - 603.2.3.4. Have the capacity to provide the full range of Perinatal Case Management Services as described in Chapter 900, Sections 903, 904, 905, and 906.
 - 603.2.3.5. Maintain documentation of all services provided to perinatal case management participants.
 - 603.2.3.6. Coordinate all appropriate referrals (e.g. WIC) with local health departments, primary and rural health clinics, private physicians, federally qualified health centers, community agencies, etc.

- 603.2.4. Paraprofessional staff may be utilized to support case management services when performed under the supervision of the qualified case manager. This staff must:
- 603.2.4.1. have one year of human service delivery experience or documented college level course work in health or human services acquired within the previous five years.
 - 603.2.4.2. have a demonstrated ability to provide or coordinate pregnancy-related health and human services
 - 603.2.4.3. have documented evidence of program orientation and training

All providers must maintain current documentation of qualifications for each person providing case management/support services; these records should include orientation program and materials, training, and satisfactory evaluation of skills needed to carry out the program. Keep these records in a central location as well as documentation of successful training in an individual's record. Train-the-trainer is appropriate from previously trained PCMs to new staff.

Services must be provided by the enrolled Perinatal Case Management provider's perinatal case manager.

604. Collaboration Between Providers Must Take Place In Order To Avoid Duplication Of Services

Certain members may be eligible for other types of case management services. Providers should establish whether the member is receiving case management services from any other provider. Once it has been established that a member is receiving other types of case management, the Perinatal Case Management provider MUST determine who is best suited to meet the individual member's needs. Duplication of targeted case management services is strongly discouraged. In order to ensure that a coordinated approach to service delivery occurs and that duplication does not occur, case management providers must collaborate with each other.

Chapter 700: Special Eligibility Conditions

All pregnant Medicaid members are eligible to participate in the Perinatal Case Management Program. The target groups are women at risk for adverse outcomes and women who are under the age of 21.

Chapter 800: Prior Approval

Perinatal Case Management (PCM) services for Fee for Service (FFS) women do not require prior approval. If a Medicaid pregnant member is enrolled in a Georgia Families care management organization (CMO), the CMO should be contacted regarding any policies and procedures pertaining to prior approvals for its perinatal case management program.

Chapter 900: Scope Of Services

901. General

Perinatal Case Management (PCM) is an ongoing process that responds to care needs as they evolve throughout the pregnancy and post-partum period. PCM includes: contact with non-eligible individuals that are directly related to identifying the eligible woman's needs and care for the purposes of helping the eligible woman access services; identifying needs and supports to assist the eligible woman in obtaining services; providing case managers with useful feedback; and alerting case managers to changes in the eligible woman's needs.

NOTE: PCM services will not be used to restrict a woman's access to other services under the Medicaid State Plan. Women will not be compelled to receive PCM services, condition receipt of PCM services on the receipt of other Medicaid services, or condition receipt of other Medicaid services on the receipt of PCM services.

902. Covered Services

902.1. Perinatal Case Management includes the following:

- 902.1.1. One initial prenatal comprehensive face-to-face assessment, per pregnancy, of the woman's needs to determine her need for any medical, educational, social or other services. Section 903 describes the minimum required components of the initial comprehensive assessment conducted during the initial prenatal comprehensive visit. The assessment activities include:
 - 902.1.1.1. Taking a client history;
 - 902.1.1.2. Identifying the woman's needs and completing related documentation;
 - 902.1.1.3. Assessing the woman's reproductive life plan
 - 902.1.1.4. Gathering information from other sources such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the eligible individual;
- 902.1.2. Periodic reassessment for women identified as at risk for an adverse birth outcome. Periodic reassessment of needs will take place monthly as a component of their case management follow up. Additional or different needs identified will be added to their plan of care. Reassessments may be face-to-face (for women with complex needs or at the woman's request) or telephonic.
- 902.1.3. Development (and periodic revision) of a plan of care that is based on the information collected through the assessment that:

- 902.1.3.1. Specifies the goals and actions to address the medical, social, educational, and other services needed by the woman;
- 902.1.3.2. Includes activities such as ensuring the active participation of the eligible woman, and working with the woman (or the woman's authorized health care decision maker) and others to develop those goals; and
- 902.1.3.3. Identifies a course of action to respond to the assessed needs of the eligible woman.
- 902.1.4. Monitoring and follow up activities:
 - 902.1.4.1. Activities and contacts with the woman (either face-to-face or telephonic) occur at least monthly during the pregnancy. They are necessary to ensure the plan of care is implemented and adequately addresses the eligible woman's needs. These activities and contacts may also be with family members, service providers, or other entities or individuals and conducted as frequently as necessary. The purpose of this monitoring is to determine whether the following conditions are met:
 - 902.1.4.1.1. The services are being furnished in accordance with the woman's plan of care;
 - 902.1.4.1.2. The services in the plan of care are adequate; and
 - 902.1.4.1.3. Any changes in the needs or status of the woman are reflected in the plan of care.

In order to provide basic information about the program, the Medicaid member should be given a copy of the PCM Questions and Answers sheet located in Appendix C. The member is free to choose any perinatal case manager who is enrolled or contracted with a PCM Program enrolled provider. The Medicaid member should have only one targeted case management provider providing case management services at any one time during the perinatal period. Before providing service, it must be determined if the Medicaid member already has a case manager for the current pregnancy. If she does not, the PCM program should be explained to her.

The PCM Information form (in Appendix D) must be completed by the member before any billable program

services are provided. A copy should be given to the member.

903. Initial Prenatal Comprehensive Visit and Assessment (New Patient)

The initial prenatal comprehensive visit is a face-to-face visit conducted at an appointment date and time agreed to by the member. The initial prenatal comprehensive visit is for newly pregnant Medicaid enrolled (presumptive eligible or full Medicaid enrollment) women whose case management and administrative records need to be established. During this visit, the perinatal case manager conducts an in-depth assessment of the woman as described below. Priorities must be set based on this comprehensive assessment. Initial linkages must be made with required services for no less than the top three priorities. Appendix E contains the Initial Comprehensive Assessment Form.

- 903.1. The initial prenatal comprehensive face-to-face assessment occurs once per pregnancy and includes: a medical and reproductive health assessment; a review of the nutrition, psychosocial, and health education needs of the woman; gathering information from other sources such as family members, medical providers, social workers, and educators to form a complete assessment of the member; and a reproductive life plan discussion. The reproductive life plan discussion will include information about the availability of immediate postpartum long-acting reversible contraceptive (LARCs).
 - 903.1.1. The nutrition assessment evaluates (at a minimum) the woman's resources for obtaining and preparing food, nutritional status, dietary habits, and dietary risk factors; identifying the woman's needs and completing documentation;
 - 903.1.2. The psychosocial and socioeconomic assessments evaluate:
 - 903.1.2.1. Economic/environmental factors to include employment, insurance, housing conditions, transportation needs, and substance, alcohol or drug use;
 - 903.1.2.2. Education status;
 - 903.1.2.3. Attitudes toward pregnancy;
 - 903.1.2.4. Parenting experience;
 - 903.1.2.5. Support systems; and
 - 903.1.2.6. Emotional resources and needs.
 - 903.1.3. The health education assessment will evaluate the health education needs and risk reduction factors.
 - 903.1.4. Following completion of the various components of the initial prenatal comprehensive assessment, a written, reproductive life plan and an individualized plan of care to meet the identified needs and goals of the woman must be developed. The individualized plan of care must include a list of the identified problems, an intervention or resolution for each,

and be implemented following development.

The perinatal case manager will assist the woman in locating Medicaid and community providers and making the necessary connections to the service needs identified in the plan. The case manager must send the initial prenatal comprehensive assessment, reproductive life plan and plan of care to the woman's OB or primary care provider (only after confirmation with the practitioner's office that the practitioner is providing care for the woman) or to the woman's selected care management organization (CMO) only after confirming the woman's assignment to this CMO in the woman's file within the Georgia Medicaid Management Information System (MMIS). When the PCM initial prenatal assessment is conducted during a woman's third trimester of pregnancy, the perinatal case manager's first priority is to send a copy of the completed assessment, reproductive life plan and plan of care to the woman's confirmed OB provider. The completed PCM initial prenatal assessment, reproductive life plan and plan of care **MUST ONLY** be submitted and shared with the woman's selected CMO or OB/primary care provider - otherwise it will constitute a HIPAA violation. Ongoing contact and collaboration with the clinician and other service providers must be maintained and documented. Appropriate authorization should be obtained from the woman for this ongoing collaboration.

903.2. One initial prenatal comprehensive visit and assessment will be paid per pregnancy.

904. Periodic Re-assessments/Follow-Up Visits

904.1. Follow-up visits, either face-to-face or telephonic, will be paid throughout the pregnancy. Follow-up visits may not be provided after delivery.

904.1.1. A brief follow-up visit/contact with the woman is required at least monthly during the pregnancy. These visits/contacts are necessary to ensure the plan of care is implemented and that it adequately addresses the woman's needs. Activities and contacts may also include contacts with family members, service providers, or other entities or individuals and should be conducted as frequently described in the plan of care. The purpose of this monitoring is to determine whether the following conditions are met:

904.1.1.1. The services are being furnished in accordance with the woman's plan of care;

904.1.1.2. The services in the plan of care are adequate; and

904.1.1.3. Any changes in the needs or status of the woman are reflected in the plan of care.

904.1.2. An extended prenatal follow-up visit may be required to reassess the medical, nutrition, psychosocial and health education needs. The plan of care should be reviewed and evaluated for continued appropriateness and updated if necessary during the extended prenatal follow-up visit.

905. Postpartum Visit

Postpartum services are provided only to established women who received prenatal PCM services. The postpartum visit should occur at least thirty (30) days post-delivery. This face-to-face or telephonic visit must be completed within 1 year of delivery and cannot be later than the last day of Medicaid eligibility.

At this visit, a reassessment will be made. Needs will be identified, and the service plan will be updated. Linkages will be made based on the mother's needs for postpartum, family planning and other services. Assistance will be provided with Medicaid eligibility determination, WIC, EPSDT, and other services needed by her infant. The reproductive life plan discussion should be repeated. The postpartum visit will be paid once per pregnancy.

906. Documentation of Services

- 906.1. An individual record must be maintained for each woman receiving perinatal case management services. All services must be documented.
- 906.2. The properly executed PCM Information Form (in the Appendix D) must be kept in the patient's record.
- 906.3. Appendices E, F, G, and H represent required information. Providers must ensure collection and documentation of all data. The information must be kept current. Providers must use the Initial Prenatal Comprehensive Assessment form and may use the progress notes forms shown or may use their own. Progress notes should be narrative in nature (not a check list), and must be signed and dated by the person documenting the information.
- 906.4. There should be documentation related to all appointments that addresses the outcome of each appointment, pertinent findings, and any actions or interventions taken by the case manager when necessary.
- 906.5. There should be documentation that the plan of care is reviewed and evaluated by the case manager for continued appropriateness. Adjustments, additions, and updates to the plan should be noted.
- 906.6. When paraprofessional staff members are utilized, there should be evidence that the case manager has reviewed and evaluated their documentation at least monthly.
- 906.7. PCM records and documentation related to services for which claims are submitted must be readily available for on-site audits and reviews by the Division or its agents. These records must be available within the time frame of the on-site visit, whether announced or unannounced. Records less than two years old should be kept on-site.
- 906.8. The Program Integrity Section is responsible for appropriate follow-up on all information regarding fraudulent or abusive provider and member activities.
- 906.9. The following information must be included and maintained in each case record for all eligible women:
 - 906.9.1. The name of the woman

- 906.9.2. The dates of the perinatal case management services
- 906.9.3. The name of the perinatal case management provider and the perinatal case manager
- 906.9.4. The nature, content, units of perinatal case management service received and whether goals specified in the plan of care have been achieved
- 906.9.5. The need for, and occurrence of, coordination with other case managers
- 906.9.6. A timeline for obtaining needed services
- 906.9.7. A timeline for re-evaluation of the plan

Chapter 1000: Basis For Reimbursement

1001. Reimbursement Methodology

PCM Services will be reimbursed on a fee-for-service basis billed using the CMS- 1500 claim form. The fee schedule rates are the same for both governmental and private providers of perinatal case management services. See Appendix A of this manual for a list of covered codes with their reimbursement rates.

The CMS 1500 claim form must be used on or after April 1, 2014.

1002. Billing for Services For FFS Members

When filing for reimbursement, it is necessary to use a diagnosis code. The provider may use any appropriate ICD-10 diagnosis code with an appropriate HCPCS code.

Effective since October 1, 2015, ICD-10 – CM Diagnosis Codes must be used with the HCPCS codes. The diagnosis codes should be placed in field 21, and referenced in field 24 E of the CMS 1500 Claim Form.

Public Health providers must confirm the woman's choice of her OB or primary care practitioner (if she will remain a FFS member) or the woman's choice of her CMO (if she will be enrolled in Medicaid managed care) prior to sending the PCM initial prenatal comprehensive assessment and plan of care to either entity and prior to submitting a claim for the PCM services. Confirmation must be obtained from the practitioner's office or the Georgia MMIS where assignment to a CMO is documented. The initial prenatal comprehensive assessment may only be billed once during the pregnancy.

The initial prenatal comprehensive visit (H1000) must be paid before other visits (H1003, H1002 or T2022U1) can be paid. See Appendix A for detailed information.

NOTE: The H- codes mentioned above provide greater specificity regarding the delivery of perinatal case management services.

If a second comprehensive evaluation is performed in less than 180 days for a different pregnancy, the provider should submit a paper claim and the completed CLAIM ATTACHMENT located in Appendix H. It is not necessary to first receive a denial.

The CLAIM ATTACHMENT should be completed only when the provider has documented proof of the previous pregnancy. This must be kept in the member's PCM record and should include the name of the previous relevant provider.

This claim attachment should **NOT** be submitted if required documentation is not in the record. Submit the claim along with the attachment to:

Georgia Health Partnership/Member and Provider Correspondence
P.O. Box 105200 Tucker, GA 30085-5200

The post postpartum follow-up visit may be billed only once per pregnancy. Postpartum case management services must be completed within 1 year after delivery and cannot be later than the last day of Medicaid eligibility.

Appendix A
HCPCS Codes

HCPCS Code	Description	Rate	Required Modifier
H1000	Initial Comprehensive Visit	\$72.60	None
H1003	Brief Follow-up Visit	\$12.10	None
H1002	Extended Follow-up Visit	\$36.31	None
T2022	Postpartum Follow-up Visit	\$48.40	U1

Questionnaire***

PERINATAL CASE MANAGEMENT PROGRAM

Perinatal Case Management Provider Name: _____

Provider Contact Person: _____ Telephone Number: _____

**COMPLETE THE FOLLOWING QUESTIONS AND ATTACH
DOCUMENTATION WHERE INDICATED.**

1. Please identify your staff members that will serve as case managers for the Perinatal Case Management Program? (*Please list names.*)

GA licensed physicians: _____

Physician's Assistants (working under the direction of a licensed physician):

Nurse Practitioners: _____

Certified Nurse-Midwives: _____

GA licensed Registered Nurses: _____

2. Do the licensed staff members, including the registered nurses, have at least one year of direct experience in the delivery of perinatal care?

Yes _____ No _____

Please attach a complete job history with dates, name of employer, location, and description of responsibilities.

Printed Name: _____ Date: _____

Authorized Perinatal Case Management Provider Representative

Signature: _____ Title: _____

Appendix C
Questions and Answers

A. PERINATAL CASE MANAGEMENT PROGRAM

i. WHAT IS IT?

A Medicaid program that pays for a case manager to assist a pregnant woman in identifying her special needs and helps her find ways to meet those needs.

ii. WHAT IS THE PURPOSE?

In the state of Georgia, approximately 9 out of 100 babies weigh less than 5½ pounds and do not get off to the best start. If women are able to find the help they need while they are pregnant, they can take better care of themselves. This has a positive effect on the weight and health of the unborn baby.

iii. WHY SHOULD I HAVE A CASE MANAGER?

It can be very confusing to know where to look for different kinds of help. Would you know how to find childbirth education classes, a nutritionist, or a nurse to come to your home to check you and your baby? A Perinatal case manager knows how to get assistance quicker than if you had to do it on your own.

iv. WHO CAN PARTICIPATE IN THE PROGRAM?

Any Medicaid eligible pregnant woman at risk for a poor birth outcome.

v. WILL MY MEDICAID BE REDUCED IF I DON'T PARTICIPATE?

No. Your participation is completely voluntary.

vi. HOW DO I GET A CASE MANAGER?

If enrolled in a CMO, contact the CMO that you are enrolled with to seek assistance and additional information about their case management services.

vii. WILL I HAVE TO PAY ANYTHING FOR THE CASE MANAGER?

No. Although this service is not free, it is fully covered by your Medicaid benefits.

viii. WHAT IF I WANT MORE THAN ONE CASE MANAGER?

Medicaid will only pay for one case manager at a time. It is best if you stay with the case manager you select for your whole pregnancy if possible.

Appendix D

Perinatal Case Management Information

GEORGIA DEPARTMENT OF
COMMUNITY HEALTH

Approximately 9 out of 100 babies born in Georgia are “low birth weight” which means they weigh less than 5½ pounds and do not get as good a start as they should. The Perinatal Case Management program is a voluntary program available to pregnant women who are members of Georgia Medicaid. The goal of the program is to improve pregnancy outcomes by providing a case manager to help the expectant mother get services specific to her needs. Medicaid pays the perinatal case manager for this service so there is no charge to the Medicaid member.

Medicaid approved perinatal case managers are located in several locations including: health departments; doctors’ offices; and private agencies. These case managers have experience in mother and baby health. If you choose to participate in this program, a case manager will help you find the care and services you need.

What should you expect from your perinatal case manager?

At your first visit, a case manager will ask you many questions in order to make a complete assessment. Then the two of you will identify and discuss your needs and agree on a detailed plan of care to meet those needs. You will be linked with the appropriate services and later, if you enroll in a CMO, a new case manager will be assigned and will check back with you to be sure you received what you needed as outlined in your plan. Your case manager will contact you at least once each month to be sure you are following the plan that was developed. You should feel free to contact your case manager anytime during your pregnancy. If your needs should change, the case manager will work with you to update and modify your plan to meet these new needs right up to delivery. You will also be reassessed by your case manager after you deliver in order to link you with services based on your updated needs, for example, family planning services for you and Health Check for your baby.

What are your responsibilities?

The first step is to complete the initial comprehensive assessment and the reproductive life plan. The selection of your case management provider should be completely **YOUR CHOICE**. It is important that you feel comfortable working with your case manager throughout your pregnancy. We ask that you sign below indicating that you do not already have a Perinatal Case Manager at this time. (You will be given a copy.) Medicaid will pay for only one case manager at a time.

Keep your perinatal case manager informed of your current address, telephone number, and other ways to reach you. If you move, let them know. Notify them of any change in your condition and keep them up to date on all your needs.

I have read and understand the information above. It is my statement that I do not have a Perinatal Case Manager at this time and have not previously signed this document for my current pregnancy.

Pregnancy-Related History

Current weight: _____ lbs. Height: _____ ft. _____ in. Date of last menstrual period: _____

Member is _____ weeks gestation Was pregnancy planned? ☐ Yes ☐ No

Is the pregnancy wanted?: ☐ Yes ☐ No If unwanted, what is the plan? _____

Were options discussed? ☐ Yes ☐ No Is the father of the baby involved? ☐ Yes ☐ No

Does the father accept the pregnancy? ☐ Yes ☐ No ☐ Not sure

If yes, provide father's name, address and phone number: _____

Does the father of this baby plan to be supportive, even if it is just emotional support? ☐ Yes ☐ No

If no, provide the patient with community resource information.

Does the father/partner have a history of alcohol or drug use, violence, abuse or neglect of the patient or their children?

☐ Yes ☐ No If yes, describe: _____

Any other domestic violence or feelings of being unsafe in the home? ☐ Yes ☐ No

Any religious objections to medical treatment (e.g. refusal of blood transfusion)? ☐ Yes ☐ No

Please describe: _____

Assistance needed to locate an OB provider? ☐ Yes ☐ No WIC referral? ☐ Yes ☐ No Plan to breastfeed? ☐ Yes ☐ No

Problems with current pregnancy such as bleeding or cramping or other pregnancy problems? ☐ Yes ☐ No

If yes, what problems? _____ Doctor notified: ☐ Yes ☐ No

Currently experiencing morning sickness? ☐ Yes ☐ No Able to keep meals down on most day? ☐ Yes ☐ No

Any urinary tract problems (UTI/Pyelo/Bacteriuria) during current pregnancy? ☐ Yes ☐ No

Symptoms of depression at present? ☐ Yes ☐ No

Depression with past pregnancies or following past pregnancies? ☐ Yes ☐ No

Other current mental health concerns? ☐ Yes ☐ No If yes, list them: _____

Any additional stress not related to current pregnancy? ☐ Yes ☐ No Describe: _____

Any prescription medications other than prenatal vitamins? ☐ Yes ☐ No Dosages and frequency: _____

Premature delivery less than 37 weeks gestation? ☐ Yes ☐ No How many? _____

If yes, was it associated with an underlying maternal health condition? ☐ Yes ☐ No

History of low birth weight births <2500 grams? ☐ Yes ☐ No How many? _____

History of very low birth weight births < 1500 grams? ☐ Yes ☐ No How many? _____

Date of last Flu shot: _____ Prior treatments for pregnancy-induced hypertension: ☐ Yes ☐ No

If yes, describe treatment: _____

Any problems with the cervix during previous pregnancies? ☐ Yes ☐ No Describe: _____

Other medical problems during previous pregnancy(ies) or current pregnancy that have not been discussed? ☐ Yes ☐ No

Describe: _____

Nurse name (print): _____ Health Department: _____

Phone Number: _____

OB Provider Name: _____ OB contact info: _____

Reproductive Life Plan

Name: _____ Medicaid ID: _____ Date: _____

It is important to let your health care provider know what your plans are for having, or not having, children and for protecting yourself from sexually transmitted infections. Your health care provider can then better help you with your family planning or contraceptive needs, and better advise you about ways to protect your own health and the health of any children you desire to have.

Please tell us about your plans for having, or not having, children and for protecting yourself from sexually transmitted infections by checking the box which is closest to your answer.

A. How would you describe your desire to have a child?

- ☐ I DO NOT want to have a child ever (or ever again)
- ☐ I DO want to have a child:
- ☐ Now or in the next year
- ☐ In 1 to 2 years
- ☐ In 3 to 4 years
- ☐ In 5 or more years
- ☐ I am unsure about when
- ☐ I am unsure about whether I want to have a child now or in the future

B. Do you (or your partner) do anything to prevent pregnancy or sexually transmitted infections?

- ☐ I don't have a partner or I'm not sexually active right now
 - ☐ I am sexually active with a partner of my same sex
 - ☐ No, I (and my partner) do not do anything to prevent pregnancy or sexually transmitted infections
 - ☐ Sometimes when we have sex, I (or my partner) do something to prevent pregnancy or sexually transmitted infections
 - ☐ Every time we have sex, I (or my partner) do something to prevent pregnancy or sexually transmitted infections
- If you (or your partner) do something to prevent pregnancy or sexually transmitted infections 'Sometimes' or 'Every time' you have sex, what method do you use:
- | | |
|--|---|
| ☐ Condoms | ☐ Diaphragm |
| ☐ Birth control pills | ☐ Intrauterine device (IUD) or implant |
| ☐ Patch | ☐ My tubes are tied (tubal ligation) |
| ☐ Depo-Provera | ☐ My partner had a vasectomy |
| ☐ Vaginal ring | ☐ Other |

C. Is there a method of birth control that you or your partner have thought about using or about which you would like to learn more?

D. Are you having (or have you had) problems with a birth control method that you would like to talk about with your provider today?

E. Are you concerned about any sexually transmitted infections?

- ☐ No ☐ Maybe ☐ Yes

Appendix J

General Claims Submission Policy for Ordering, Prescribing, or Referring (OPR) Providers

The Affordable Care Act (ACA) requires physicians and other eligible practitioners who order, prescribe and refer items or services for Medicaid beneficiaries to be enrolled in the Georgia Medicaid Program. As a result, CMS expanded the claim editing requirements in Section 1833(q) of the Social Security Act and the providers' definitions in sections 1861-r and 1842(b) (18) C. Therefore, claims for services that are ordered, prescribed, or referred must indicate who the ordering, prescribing, or referring (OPR) practitioner is. The department will utilize an enrolled OPR provider identification number for this purpose. Any OPR physicians or other eligible practitioners who are NOT already enrolled in Medicaid as participating (i.e., billing) providers must enroll separately as OPR Providers. The National Provider Identifier (NPI) of the OPR Provider must be included on the claim submitted by the participating, i.e., rendering, provider. If the NPI of the OPR Provider noted on the Georgia Medicaid claim is associated with a provider who is not enrolled in the Georgia Medicaid program, the claim cannot be paid.

Effective 4/1/2014, DCH will begin editing claims submitted through the web, EDI and on CMS- 1500 forms for the presence of an ordering, referring or prescribing provider as required by program policy. The edit will be informational until 6/1/2014. Effective 6/1/2014, the ordering, prescribing and referring information will become a mandatory field and claims that do not contain the information as required by policy will begin to deny.

For the current CMS-1500 claim form:

Enter qualifiers to indicate if the claim has an ordering, referring, or prescribing provider to the left of the dotted line in box 17 (Ordering = DK; Referring = DN or Supervising = DQ).

For claims entered via the web:

Claims headers were updated to accept ordering or referring Provider ID and name for Dental and Institutional claims and the referring provider's name for Professional claims. The claim detail was updated to accept an ordering or referring provider ID and name. Utilize the "ordering" provider field for claims that require a prescribing physician.

For claims transmitted via EDI:

The 837 D, I, and P companion guides were updated to specifically point out the provider loops that capture the rendering, ordering, prescribing, referring and service facility provider information that is now used to transmit OPR information.
