PART III - CHAPTER 600
SPECIFIC PROGRAM REQUIREMENTS
FOR
SUPPORT COORDINATION SERVICES

SCOPE OF SERVICES

This chapter 600, Part III of the New Options Waiver and the Comprehensive Supports Waiver Programs replaces Chapter 2800 in the NOW Waiver Policy, Part III and Chapter 2900 in the COMP Waiver Policy, Part III.

600 General

Support Coordination services are a set of interrelated activities for identifying, coordinating, and overseeing the delivery of services to enhance the health, safety and general wellbeing of waiver participants within the context of the person's goals toward maximum independence. Support Coordination services include the following:

- 1. Facilitating the Service Planning Process and Individual Service Plan Development**
- 2. Coordinating Waiver Services**
- 3. Coordinating Non-Waiver Services, Community Engagement and Resource Development**
- 4. Evaluating the Quality and Outcome of Services and Identifying Unmet Needs**
- 5. Assessment and Evaluation Related Tasks**

Support Coordination services assist participants in coordinating all services, whether Medicaid reimbursed services or services provided by other funding sources. These services include completing the Individual Service Plan (ISP) document and any revisions or reviews, and monitoring the implementation of the ISP, the health and welfare of participants, and the quality and outcome of services. The frequency of Support Coordination services is based on the individual needs of the participant and as required to address any identified health and safety risks or service provider issues.

Support Coordination services are provided by agencies that employ a sufficient number of Support Coordinators to meet the Support Coordination services needs of participants served by the agency. Support Coordinators are responsible for monitoring the implementation of the ISP, assisting in the coordination of ISP revisions, and assist the waiver participant and/or representative in locating a service provider. Monitoring includes direct observation, review of documents, and follow up to ensure that services plans have the intended effect and approaches to address challenging behaviors, medical and health needs, and skill acquisition. Support Coordinators are also responsible for the ongoing evaluation of the satisfaction of participants and their families with the ISP and services delivery. Support Coordinators assist participants and their families or representatives in making informed decisions about the participant-direction option and assist those who opt for participant-direction with enrollment and management of this option for service delivery.

601 Special Requirements of Participation

In addition to those conditions of participation in the Medical Assistance Program as outlined in Part I, Policies and Procedures for Medicaid/PeachCare for Kids Manual applicable to all Medicaid providers, Section 106 (General Conditions of Participation), and Part II, Chapter 600 Policies and Procedures for the COMP Program, Support Coordination Services agency providers must meet the following requirements:

Agency Experience

Provider agencies rendering Support Coordination services must:

1. Have at minimum five (5) years' experience in providing home and community based case management services for individuals with disabilities or similar HCBS populations, and demonstrate success in supporting individuals in community inclusion and person centered planning;
2. Have established or will establish working relationships with local community and advocacy groups, experience advocating for individuals in the community, and preparing individuals for self-advocacy;
3. Have experience and demonstrated success with outcome based planning, and developing plans based on the individual's goals, choices and direction;
4. Have experience with measuring quality of services and satisfaction with services, ensuring that the services that are provided are consistent with quality measures and expectations of the individual;
5. Demonstrate experience in serving diverse cultural and socioeconomic populations.
6. Assure compliance with the conflict-free case management requirement outlined in the 2014 HCBS Rule.

Rev 01 2017 As a care management entity, you are required to adhere to the following characteristics of conflict-free case management:

- ***Separation of case management from direct services:*** Structurally or operationally, care coordinators should not be employees of any organization that provides direct services to the individuals. Ideally, conflict-free case management agencies are stand-alone and provide **no** other direct services. This prevents financial pressure for care coordinators to make referrals to their own organization or “trade” referrals.
- ***Separation of eligibility determination from direct services:*** Eligibility for services is established separately from the provision of services so assessors do not feel pressure to make individuals eligible to increase business for their organization. Eligibility is determined by an entity or organization that has no fiscal relationship to the individual. In our system, this occurs through the level-of-care determination process.
- ***Case managers do not establish funding levels for the individual:*** In the Georgia model, the care coordinator/manager’s responsibility is to develop a recommended plan of supports and services based on the individual’s assessed needs. Ultimately, DCH staff and its agencies will determine whether the care plan is medically necessary.
- ***Individuals performing evaluations, assessments and plans of care cannot be*** related by blood or marriage to the individual or any of the individual’s paid caregivers, or financially responsible for the individual.

602 **Staff Qualifications and Responsibilities**

Rev 07 2016 Provider agencies rendering Support Coordination Services must have staffing that meets the following requirements:

1. One individual may perform one or more of the following functions for the agency.
2. A designated Agency Director who must have either a bachelor’s degree in a human service field (such as social work, psychology, education, nursing, or closely related field) or business management and three years of experience in service delivery to persons with developmental disabilities, with at least three years in a supervisory capacity.

Duties of the Agency Director include, but are not limited to:

- a. Oversees the day-to-day operation of the agency;
- b. Manages the use of agency funds;
- c. Ensures the development and updating of required policies of the agency;
- d. Manages the employment of staff for the agency; and
- e. Designates another agency staff member to oversee the agency, in his or her absence.

3. At least one employee with the agency must:
 - a. Have responsibility for overseeing the quality of Support Coordination Services to participants.
 - b. Be a Developmental Disability Professional (DDP) (for definition, see *Part II Policies and Procedures for COMP, Appendix I*)
4. Have a sufficient number of supervisory staff to train, support and supervise Support Coordinators.
5. Have a sufficient number of quality assurance staff to review a sample of ISPs for quality and outcome indicators and to provide oversight to Support Coordinators in instances where health and safety risks are identified for participants in effort to improve health outcomes.
6. The agency must have an adequate number of Support Coordinators to meet the needs of the assigned participants. Support Coordinators provide the covered services in Section 603 at a minimum. The agency is responsible for documenting support coordinator's qualifications and maintaining that documentation in individual personnel files prior to provision of waiver services. Support Coordinators must meet the following qualifications:
 - a. Be at least 21 years of age;
 - b. Have a minimum of a bachelor's degree in a human service field, such as social work, psychology, special education, nursing, or closely related field.
 - c. Have at least one year of experience in serving persons with developmental disabilities or related disabilities in a case management or coordination role;
7. Have for each DBHDD region served a designated on-call system which:
 - a. Provides liaison assistance to the DBHDD Field Office 24 hours a day, 7 days a week.
 - b. Provides emergency assistance as directed by the DBHDD Field Office in coordination of services and supports
 - c. Provides supervision to support coordinators while on call
- 8) Must have a current Organization Chart showing lines of authority and responsibility for all staff within the agency and includes position descriptions for all staff.

603 **Covered Services**

Rev 07 2016 Reimbursable Support Coordination Services include the following based on the assessed need of the participant and as specified in the approved ISP:

1. Facilitating the Service Planning Process and Individual Service Plan Development
 - a. Update Personal Profile and hold pre-meetings with participant, support network, and service providers for development of the annual Individual Service Plan (ISP) to respond to the assessed needs of the participant.
 - b. Convene ISP development/amendment meetings and facilitate the development of the written ISP document.
 - c. Include edits or revisions that reflect assessed needs and include the goals to be achieved through support from specific waiver services and other non-waiver services needed by the participant.
 - d. Coordinate and facilitate ISP development among both professionals and non-professionals who provide individualized supports.
 - e. Document action plans or ISP team discussion, addressing any conflict between preferences and issues of health and safety.
 - f. Assist all selected providers in understanding full implementation of the ISP, including goals and intent for all planned services.
2. Coordinating Waiver Services
 - a. Assisting the participant with selection of service provider agencies to deliver the needed services and supports and achieve goals identified in the ISP. This includes arranging and attending meetings, as necessary, to coordinate with other providers and/or community organizations.
 - b. Providing information and assistance that helps the participant and his or her family or representative in making informed decisions about the participant-direction option and assisting each participant who opts for participant-direction with enrollment in this option.
3. Coordinating Non-Waiver Services, Community Engagement and Resource Development
 - a. Taking active measures to gather information about non-waiver funded services or supports in the participant's community that may assist in addressing their needs and/or goals.
 - b. Participating in activities that help link eligible participants with medical, social, and/or educational providers or other programs and services that are capable of providing needed services to address identified needs and to achieve goals specified in the ISP.
4. Evaluating the Quality and Outcome of Services and Identifying Unmet Needs
 - a. Contacting participants as needed to address any identified health and safety

Rev 07 2016

- risks and progress toward personal goals.
- b. Monitoring service delivery and determining if there are unmet needs
- c. Referral for additional or different services, request for clinical validation of a change in need, and follow-up activities. See Appendix G for *Service Change/Technical Assistance Request* form and instructions guide.
- d. Evaluation of the satisfaction of participants and their families with the ISP and its implementation.
- e. Monitoring of the health and welfare of the participant, through direct observation, review of documents, and follow up to ensure that service plans have the intended effect and that approaches to address challenging behaviors, medical and health needs, and skill acquisition are coordinated in their approach and anticipated outcome

Rev 07 2016

5. Assessment and Evaluation Related Tasks
 - a. Conduct or facilitate the completion of the SIS assessment for any participant, as needed.
 - b. Review the HRST, including all service considerations and training recommendations, in order to incorporate assessed needs and individual specific health and safety considerations in the ISP.
 - c. Review all clinical evaluations and support responsible parties in coordinating action responsive to the recommendations.
 - d. Review all healthcare plans, Positive Behavior Support Plans (PBSPs), crisis plans and safety plans, including a review tracking documentation maintained by providers to determine if it meets standards.
 - e. Complete the annual DMA-7 level to facilitate level of care re-evaluation for each participant.

604 Non-Covered Services

1. Support Coordinators cannot provide other direct waiver services, including Community Guide Services, to any waiver participant.
2. Payment is not made, directly or indirectly, to members of the participant's immediate family.
3. Services provided to participants during full-month periods of institutionalization may not be billed unless specified as transition coordination. Discharge planning during periods of institutionalization must continue in order to safely and effectively transition individuals from institutions back into community settings.
4. The provision of services to enrolled participants in Institution for Mental Diseases (IMD) units.
5. Services that duplicate case management services provided to an eligible participant through a Targeted Case Management Program as prohibited by Medicaid.

6. Payment is not made for those goods and services covered by the State Medicaid Plan except where a participant's need exceeds State Plan coverage limits and exceptions to the coverage limits are not available.

605 Individual Service Plan Requirements

Rev 07 2016 It is a requirement that each waiver participant to have an Individualized Service Plan (ISP) written on the document specified by DBHDD Division of DD. The plan is to be developed by a planning team of appropriate persons to include, but not be limited to, the participant, the Support Coordinator, and the participant's parent, guardian or other natural support representative. This plan, developed based on assessed needs identified through the Supports Intensity Scale (SIS), Health Risk Screening Tool (HRST), clinical assessments, and additional documents as needed, identifies the participant's outcomes and planning goals and describes the services and supports needed to assist the participant in attaining the goals and outcomes identified in the plan. An approved ISP authorizes the provision of safe, secure, and dependable support and assistance in areas that are necessary to promote achievement of full social inclusion, independence, and personal and economic well-being for the participant

606 Contact Frequency

Rev 04 2018 A face-to-face visit must occur to every waiver participant, at minimum of quarterly. Anyone who resides in or spends overnights in an out-of-home placement (CRA, extended overnight respite, or settings operated through the exclusive use of paid CLS staff), must have a minimum of one face-to-face visit from their Support Coordinator per month.

One *Individual Quality Outcome Measures Review* must be completed quarterly for waiver recipients meeting these conditions with visits and follow up activities documented comprehensively in support notes during intervening months for individuals seen monthly. Any issues identified in intervening months will require coaching and/or referrals opened independently.

A visit to the overnight respite setting is required for any length of stay 7 calendar days or greater, during the time of out-of-home respite support.

607 Documentation Requirement

Rev 07 2016 Support Coordination documentation should reflect the course of services/supports provided to the waiver participant and skills that the participant has learned during the time those services are being provided. It is used to communicate between agencies contributing to the participant's support.

All documentation must be HIPAA compliant. For example, paper documents/case records must be stored securely with appropriate safeguards, and the participant's written authorization for release of information must be obtained before any protected health information can be shared.

Information gathered/observed during any contact with the participant or ancillary informants must be documented. The ISP must be revised as necessary to include changes in the participant's support needs and services.

Support Coordination Documentation is captured through the following methods:

Demographic Information Update

Contact must be made with the participant's next-of-kin, family member or other informal supporter annually at a minimum. The purpose of the contact is to update telephone numbers, address, or other means of contact in the online case management system (demographic page) as well as confirm under which circumstances the next-of-kin wishes to be notified or consulted in the case of participants living outside the family home.

If the participant has a legal guardian, the guardian must verify all contact information annually at a minimum and the support coordinator indicates guardianship status on the online case management system demographic page. If any changes are necessary to the guardianship status or guardian information, e.g. change of guardian, the support coordinator uploads the following documents to the participant's electronic file:

- Letter of guardianship, and
- Copy of the probate court order appointing the guardian and specifying what powers have been removed from the participant.

1. Individual Quality Outcome Measures Review

2. Support Coordinators will evaluate outcomes for all waiver recipients through use of the *Individual Quality Outcome Measures Review*. This review will be completed at a minimum of quarterly for all waiver participants, based on a face-to-face visit.

3. Referral Follow Up Tracking

4. Any contacts made, information received, or actions taken in reference to an identified concern must be documented within *Referral Follow Up Tracking* in the online case management system, such that a chronological record of these activities is held within the same section of the participant's record.

5. Support Notes

A Support Note must be entered monthly in the online case management system, at minimum, based on either a successful face-to-face visit or a successful ancillary contact.

Support Notes are to be entered into the online case management system for all contacts made on behalf of the participant, including:

- Face to face visits with the participant that occurred without completion of an *Individual Quality Outcome Measures Review*, as a result of the Support Coordination having already met the quarterly minimum requirement for completion.
- Face to face visits with the participant's natural supports, the participant's provider agency (if the participant was discussed)
- Phone calls to the participant, the participant's natural supports, the participant's provider agency (if the participant was discussed)
- Emails with the participant, the participant's natural supports, the participant's provider agency (if the participant was discussed)
- Research conducted or contacts made to seek resources for the participant
- Contact made to the Regional field Office or Central Office about the participant

608 Quality Outcome Evaluation – Recognize, Refer and Act

The Recognize, Refer, and Act Model The Recognize, Refer, and Act Model is based on the interaction of case management skills involved in recognizing unmet needs and impending risks and responding by either providing coaching, making referrals to an appropriate party, or directly linking or advocating on behalf of the participant to obtain the most appropriate resources.

The model relies on effective observation skills, the ability to gather information from all pertinent sources, tactful interviewing skills, enhanced problem solving skills, and a sound knowledge of community resources. When there are deficits in any of these skill areas, it is DBHDD's expectation that Support Coordinators seek supervision as indicated. Recognize, Refer and Act often involves a team approach for risk recognition, but relies on Support Coordinators ability to identify the most appropriate team discipline for each referral related to a particular risk area.

A primary goal of the Recognize, Refer and Act Model is to encourage a collaborative relationship between the Support Coordinator, provider agency staff, natural supports and DBHDD staff. This collaboration serves as a pathway to effectively identify any unmet needs for the waiver participant, work together to reduce or eliminate any associated risks, and ultimately achieve the best outcomes for the waiver participant. The Quality Outcome Measures Review document, included as Appendix F, facilitates the implementation of the Recognize, Refer and Act model by prompting recognition through a series of questions and providing information about referral and intervention strategies.

609 Prior Approval

Rev 10 2016

Support Coordination Services must be authorized prior to service delivery by the applicable DBHDD Field Office at least annually in conjunction with the Individual Service Plan development and with any ISP revisions.

610 Basis for Reimbursement

Reimbursement is based on a monthly unit of service. A unit of service is individually defined for each member in their Individualized Service Plan. A minimum unit must include contacts made based on the frequency outlines in Section 606 and documentation completed based on guidelines indicated in Section 607. Some ISP’s may dictate that a member must be seen at a higher frequency. The provider must bill only for the months of service during which the specified contacts and documentation are delivered.

The rate of reimbursement for a unit of service is a flat fee of \$152.88 per month with a limit of 12 units per year per member (\$1,834.56 annual maximum).

Support Coordination – T2022	\$152.88 per member per month

PART III - CHAPTER 700

**SPECIFIC PROGRAM REQUIREMENTS
FOR
INTENSIVE SUPPORT COORDINATION SERVICES**

SCOPE OF SERVICES

CONTENTS

CHAPTER 700	Intensive Support Coordination Services
Section 700	General
Section 701	Member Eligibility
Section 702	Special Requirements of Participation
Section 703	Staff Qualifications and Responsibilities
Section 704	Covered Services
Section 705	Non-covered Services
Section 706	Prior Approval
Section 707	Basis for Reimbursement

700. General

Intensive Support Coordination is a waiver service that includes all of the activities of Case Management Support Coordination (See Chapter 600), but the activities reflect specialized coordination of waiver, medical and behavioral support services on behalf of waiver participants with exceptional medical and/or behavioral needs. The need for Intensive Support Coordination is determined at initial and annual assessment and is provided as an alternative to traditional Support Coordination. Intensive Support Coordinators assist waiver participants with complex needs through: identifying and addressing barriers to care; accessing needed resources and services offered through the waiver as well as the larger healthcare system; taking active measures to address complex needs; and fostering and maintaining family and other informal relationships and support.

The provision of intensive support coordination requires advanced training, knowledge and skills required to address the severity of medical, behavioral and related needs that present in the management of physical and behavioral health, as well as interventions and activities that foster prevention of health deterioration and prevention of exacerbation of medical/behavioral conditions. Examples of conditions which may require Intensive Support Coordination include: tracheostomy care; complex suctioning, risk of choking and aspiration, dually diagnosed individuals with challenging behaviors, complex diabetes management, presence of gastrointestinal complications, and history of low trauma fractures. This list is not all-inclusive but provides examples of the level of participant risk ameliorated through the provision of Intensive Support Coordination.

Documentation must support the presence of continued need with the expectation that Intensive Support Coordinators will work closely with physicians, other healthcare providers, and waiver service providers in the management of complex conditions. The condition must support frequent and enhanced level of monitoring, intervention and follow-up which is described and clearly documented. The need for Intensive Support Coordination is determined at the initial assessment, change in condition, and annual review. Intensive Support Coordination services may be provided to individuals scheduled for transition from institutions for a period of sixty (60) to ninety (90) days prior to the discharge date; however, community-based claims will not be submitted for reimbursement until after the waiver participant has been transitioned to the community.

For maintenance of provider eligibility, providers must meet conditions established by Department of Human Services, Department of Behavioral Health and Developmental Disabilities and contained in the DBHDD Provider Manual as well as all conditions specified in the contract with the DBHDD.

701. **Member Eligibility**

Services are targeted for Medicaid eligible members who are intellectually or developmentally disabled and who currently receive or are on the short-term planning list to receive community based services through the State of Georgia, DHS, and DBHDD.

The following criteria must be met for admission to service:

1. The member is a categorically eligible recipient of Medicaid and
2. The member meets the requirements for the DBHDD Most-In-Need status, and
3. The member has a diagnosis of intellectual disability and/or developmental disability; and
4. Two or more of the following:
 - a. The member is currently receiving services that are financially supported by the Department of Human Services, Department of Behavioral Health and Developmental Disabilities (DBHDD)
 - b. The member has multiple needs as documented in the intake and assessment process and requires coordination of those multiple needs
 - c. The member has a lack of or inadequacy of natural supports as documented in the intake and assessment process
 - d. The member is currently placed on the short-term planning list awaiting services
5. Evidence substantiating the need for Intensive Support Coordination is found based on one of the following:
 - a. Member has a Health Risk Screening Tool (HRST) HCL score of 5 or 6; **or**
 - b. Member has a Supports Intensity Scale rating of 16 to 26 in the Exceptional Medical Support Needs or Exceptional Behavioral Support Needs section; **or**
 - c. Member has transitioned from a state hospital into the community since July 1, 2010; **or**
 - d. Member is on the active list to transition from an institutional setting into a community residence (mandatory enrollment upon transition); **or**

Rev 10 2016

- e. Member has been admitted to a crisis respite home and is not otherwise eligible for the service. Intensive Support Coordination is to be provided from time of crisis admission until 30 days following discharge to the community or
- f. Member met at least one of the preceding criteria within the past year or is determined through assessment to be stabilizing and continues to require oversight to prevent further deterioration in condition.

Rev 07 2018

702 **Special Requirements of Participation**

An Intensive Support Coordination Agency is selected through the enrollment process described in *Part II Chapters 600 – 1200 Policies and Procedures for Comprehensive Supports Waiver Program (COMP), and New Options Waiver Program (NOW), Sections 602, 603 and 604*. Enrolled members and their Families will be able to choose any provider authorized to provide Intensive Support Coordination in Georgia if the provider agrees to provide services in the region in which the consumer lives and has the clinical expertise to meet the specific needs of the individual. The provider must meet the conditions established by the Department of Community Health as outlined in The Policy and Procedures Manual Part I, Part II cited above, and the Provider Manuals for Community Developmental Disabilities Providers found via policy #02-1201 at <https://gadhbdd.policystat.com/>.

In addition to the general provider enrollment criteria outlined in Part II, Comprehensive Waiver Program, the Intensive Support Coordination provider agency must meet the following enrollment criteria specific to the provision of Intensive Support Coordination.

1. A minimum of five (5) years of experience in:
 - a. the health care, behavioral health or case management field;
 - b. providing home and community based case management services for individuals with disabilities or similar HCBS populations, and demonstrate success in supporting individuals in community inclusion and person centered planning;
 - c. serving individuals at risk due to medical, functional, and/or behaviorally complex conditions.
2. Agrees to participate in completion of DBHDD Provider Performance Unit Review within six months of enrollment.
3. Have established or will establish working relationships with local community and advocacy groups, experience advocating for individuals in the community, and preparing individuals for self-advocacy;

4. Have experience and demonstrated success with outcome based planning, and developing plans based on the individual's goals, choices and direction;
5. Have experience with measuring quality of services and satisfaction with services, ensuring that the services that are provided are consistent with quality measures and expectations of the individual;
6. Demonstrate experience in serving diverse cultural and socioeconomic populations.
7. The applicant agency must assure compliance with conflict free case management as outlined in 42 CFR §441.301(b) (1).
8. Meets all DBHDD provider requirements as specified either through DBHDD contract with the Medicaid enrolled provider or a Letter of Agreement between the Medicaid enrolled provider and DBHDD.
9. If licensed, the agency will maintain their license as applicable in home health, private homecare, neurobehavioral center, or other. If out-of-state, must provide a letter of recommendation from current oversight agency along with the last audit/review.
10. The provider must have access to a Medical/Clinical Director (MD or Psychologist), with consultation expertise for both Medical and Behavioral Intensive Support Coordination available. The Medical/Clinical Director need not be an employee of the agency or on retainer with the agency but the nature of the business relationship should be outlined in any type of written agreement, including but not limited to a contract, a memorandum of understanding, a letter of agreement, etc. as long as terms are clearly defined.
11. Proof of licensure is required for Intensive Support Coordination Clinical Supervisors in the designated specialty area.

Rev 04 2018

Payment for Intensive Support Coordination services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.

Rev 01 2017

National accreditation is preferred, as indicated in *Appendix I - Glossary of Terms - of the COMP Part II Medicaid Policy Manual*, or other national accrediting body relevant to the provision of case management or coordination of services.

As a care management entity, you are required to adhere to the following characteristics of conflict-free case management:

- ***Separation of case management from direct services:*** Structurally or operationally, care

coordinators should not be employees of any organization that provides direct services to the individuals. Ideally, conflict-free case management agencies are stand-alone and provide **no** other direct services. This prevents financial pressure for support coordinators to make referrals to their own organization or “trade” referrals.

- ***Separation of eligibility determination from direct services:*** Eligibility for services is established separately from the provision of services so assessors do not feel pressure to make individuals eligible to increase business for their organization. Eligibility is determined by an entity or organization that has no fiscal relationship to the individual. In the NOW and COMP Waiver Programs, this occurs through the level-of-care determination process.
- ***Case managers do not establish funding levels for the individual:*** In the Georgia model, the care coordinator/manager’s responsibility is to develop a recommended plan of supports and services based on the individual’s assessed needs. Ultimately, DCH staff and its agencies will determine whether the care plan is medically necessary.
- ***Individuals performing evaluations, assessments and plans of care cannot be related by blood or marriage to the individual or any of the individual’s paid caregivers, or financially responsible for the individual.***

703 **Staff Qualifications and Responsibilities**

In addition to the base requirements for Support Coordination Services, Intensive Support Coordination in Section 602, the following staff qualifications and patterns represent requirements specific to Intensive Support Coordination Services:

- **Medical/Clinical Director:**

The provider must have access to a Medical/Clinical Director (MD, Licensed Nurse Practitioner or Licensed Psychologist), with consultation expertise for both Medical and Behavioral Intensive Support Coordination available. The Medical/Clinical Director need not be an employee of the agency or on retainer with the agency but the nature of the business relationship should be outlined in any type of written agreement, including but not limited to a contract, a memorandum of understanding, a letter of agreement, etc. as long as terms are clearly defined.

Roles of the Medical/Clinical Director:

- **Episodic Clinical Conferences:**

The Medical/Clinical Director assuming a consultative relationship will participate in case conferences on behalf of intensive support coordination individuals as requested by the intensive support coordination agency. Case conferences are held to discuss individuals in any of the following situations:

- Those identified at high risk of or experiencing health or behavioral decline, particularly in the case of sudden onset when communication with the individual's primary care provider has been delayed or challenging.
- Individuals with unique clinical challenges who require interpretation of medical or behavioral findings, treatment plans or follow up needs to assist providers, intensive support coordinators and other stakeholders in assisting with compliance.
- Individuals who may require additional referrals, coordination of healthcare or behavioral healthcare services, or communication with the larger healthcare system.

- **Clinical Consultation for Hospitalizations:**

The admission of I/DD individuals to acute care medical facilities has, at times resulted in premature requests for end of life planning, or discharge without the proper supports. The DD primary care physicians and psychiatrist assigned to regional hospitals are reservoirs of clinical experience from which expertise could be drawn and shared with community clinicians now charged with treating DD individuals in acute care medical centers. The ISC Medical/Clinical Director will coordinate consultative clinical coverage with surrounding regional physicians.

Intensive Support Coordination Clinical Supervisor:

Intensive support coordination agencies will employ at least one Clinical Supervisor in each specialty. Specialized Clinical Supervisors will provide technical assistance and support to any intensive support coordinator as needed regardless of direct supervision assignment.

ISC-Medical Clinical Supervisor:

- Registered Nurse, physical or occupational therapist, physician assistant or other mid-level healthcare provider
- Minimum of 2 years' experience in acute care, ICF/ID long term care, or medical rehabilitation.
- Must have at minimum three (3) years' experience providing home and community-based case management services for individuals with disabilities or other related disabilities.

ISC-Behavioral Clinical Supervisor:

Must be one of the following: Board Certified Behavior Analyst, Psychologist, Licensed Professional Counselor, Licensed Associate Professional Counselor, Licensed Clinical Social Worker, Licensed Master Social Worker or a Registered Nurse.

- Must have a minimum of 2 years professional experience with individuals with complex behavioral issues in a behavioral health setting related to individuals with ID/DD (i.e. ICF/IDD, psychiatric inpatient hospital/facility, specialty clinics, or other rehabilitation/habilitation settings.
- Must have at minimum three (3) years' experience providing home and community-based case management services for individuals with disabilities or other related disabilities.

DBHDD Oversight & Certification:

- DBHDD will certify each ISC Clinical Supervisor for a five year period, if they meet education and experience requirements. Thirty (30) hours of continuing education in supervision and support coordination topics will be required annually for the renewal of the certificate, each of five years with record of continuing education maintained by the agency.

Developmental Disabilities Professional

At least one employee with the agency must:

1. Have responsibility for overseeing the quality of Intensive Support Coordination Services to participants.
2. Be a Developmental Disability Professional (DDP) (for definition, see *Part II Policies and Procedures for COMP, Appendix I*);

Duties of the DDP include, but are not limited to:

- a. Overseeing the Intensive Support Coordination services provided to participants;
- b. Document and report on any identified health and safety issues for participants; and
- c. Providing training and support to intensive support coordinators.

3. Have sufficient number of supervisory staff whose duties include, but are not limited to, training, support, and supervision of intensive support coordinators.
4. Have sufficient number of quality assurance staff whose duties include, but are not limited to:
 - a. Reviewing a 10% sample Individual Service Plans for quality and outcome indicators;
 - b. Providing oversight to intensive support coordinators in instances where health and safety risks are identified for participants in effort to improve health outcomes.

Intensive Support Coordinator

Minimum bachelor's degree in human service field, such as, social work, psychology, special education, nursing, or closely related field required.

- Minimum two years of experience serving persons with DD/IDD or related disabilities and two years' experience in a healthcare, habilitative/ rehabilitative, behavioral health setting, such as ICF/IDD, psychiatric inpatient hospital/facility, specialty clinic or program, special education department, residential or similar setting required. Experience providing care management/coordination preferred.

DBHDD Oversight & Certification:

DBHDD will certify each ISC Coordinator for a five year period, if they meet education and experience requirements. Twenty (20) hours of continuing education in support coordination topics will be required annually for the renewal of the certificate, each of five years.

Staff Responsibilities

ISC Clinical Supervisor Responsibilities:

- Has administrative authority over a small team of Intensive Support Coordinators. Each ISC Clinical Supervisor may oversee a supervisory caseload of no more than 100 ISC participants, served by the Intensive Support Coordinator who provides the direct oversight and coordination of services for waiver participants.
- Act as a clinical consultant for each of the ISC Coordinators and each of the participants served within the ISC team's caseload.
- Responsible for conducting a minimum of one annual joint visit with each ISC participant on their supervisory caseload.
- Provide ongoing consultation to determine risks and unmet needs, and collaborate in identifying and securing resources.
- Follow up, either telephonically or on site, during and following acute changes in a participant's medical, behavioral or functional status. Provide continuous consultation to the ISC Coordinator following such acute changes in condition. Collaborate with the Field Office relative to additional or immediate needs.
- Actively participate in hospital transition and discharge planning.
- Maintain familiarity with nursing or behavioral health care plans developed by provider agencies to ensure that ISC Coordinators understand the purpose and evaluate the efficacy of the plans.
- Hold monthly supervisory sessions with each of the ISC Coordinators assigned to review their caseload and the level of risk of each individual served.
- Maintain availability between supervisory sessions to help Intensive Support Coordinators solve problems around key participant issues, resolve service problems, and visit participants as part of their interdisciplinary team for clinical consultation and planning.

- Complete a review of 25% of ISC caseloads on a quarterly basis to determine if all ISC services and protocols are being followed. This review will be documented and available for review by DBHDD staff.
- Act as a resource for ISC's in navigating Medicaid State Plan/Medicare and coordinating services within the healthcare and/or behavioral services system
- Actively seek new community based resources that ISC's can offer to their participants
- Establish working relationships with local advocacy groups. Advocate for community inclusion of individuals with disabilities and preparing individuals for self-advocacy.
- Offer guidance to ISC Coordinators on outcome-based person-centered planning and developing plans based on the individual's assessed needs, goals, choices and direction.

704 Covered Services

Intensive Support Coordination Services includes those tasks related to assessment, development of the individual service plan and documentation requirements as described in Support Coordination Services, Sections 603, 604 and 605 of this document. In addition to those requirements, Intensive Support Coordination services include:

1. Identifying and/or recruiting a primary care physician, medical or behavioral health specialists and any ancillary health professionals that are indicated.
2. Including healthcare or behavior support plans in the ISP development and follow up considerations.
3. Providing information and referrals for community services, healthcare and behavioral/psychiatric services and other supports identified in the ISP.
4. Monitoring the participant's on-going needs and quality of the services outlined in the ISP and the ISP's effectiveness. This includes monitoring, evaluation and determining quality of additional behavioral supports or health care services.
5. Continuous evaluation of any changes in participant's health and well-being that indicate a need for intervention, including coordination of crisis services, reassessment and any subsequent revision of the ISP.
6. Aligning ISP development with annual clinical evaluations by the DBHDD Field Office Intake and Evaluation or Regional Quality Review Teams, to include attending clinical evaluations, when possible, to facilitate inclusion of the clinical recommendations.
7. Conducting site visits and other contacts as prescribed in the ISP:

- All participants who receive waiver services in the residence, including CLS in the family or individual's home or any service delivered in a Community Residential Alternative setting, must minimally receive one face-to-face home visit.
 - If the participant does not receive any waiver services in the residence, a face-to-face visit must be conducted monthly, however a visit to another location can occur in lieu of a home visit.
 - All participants must minimally receive one ancillary contact per month from their Intensive Support Coordinator in addition to the visit.
 - Additional points of contact may be needed based on the following conditions:
 - Within 3 business days of a known hospitalization, any other significant condition change, a known crisis admission, family or provider emergency, or other known risk to the health and safety of a participant.
 - The interdisciplinary team determined that more contact was needed and documented an increased ancillary contact or visit frequency in the participant's ISP
 - Based on case consultation, joint visit with the ISC Coordinator, or contact with a healthcare provider the ISC Clinical Supervisor determined that increased ancillary contact or visit frequency is needed.
8. Assisting the DBHDD Field Office staff to move or remove a member from harm's way in a crisis or emergency.
 9. Provide focused oversight to participants admitted to crisis respite homes, for the purpose of supporting stabilization efforts while the participant is in respite, identifying potential providers, coordinating discharge to a community residence and providing aftercare to promote continued stabilization in the community.
 10. Coordinating the transition of specific individuals institutionalized in a nursing facility (NF) or Intermediate Care Facility for the Mentally Retarded (ICFMR) who are targeted and funded for placement in home and community based services within 90 days. Additionally, the Intensive Support Coordinator is responsible for engagement and discharge planning efforts for any ISC participant who is admitted to an acute care or rehabilitation facility to facilitate a safe return to the community.

705 **Non-Covered Services**

1. Services provided in nursing homes or prisons with the covered exception as designated in #10 listed above.

2. Separately reimbursed counseling services for participants or family members.
3. The provision of services to enrolled members in an Institution for Mental Diseases (IMD) Units.
4. Services that duplicate case management services provided to eligible members through other Targeted Case Management Programs as prohibited by Medicaid.

706. Prior Approval

Prior approval for Intensive Support Coordination services is authorized by the Department of Behavioral Health and Developmental Disabilities' (DBHDD) Regional Offices.

707. Basis for Reimbursement

Reimbursement is based on a monthly unit of service. A unit of service is individually defined for each member in their Individualized Service Plan. A minimum unit must include one face-to-face contact per month, but some ISP's may dictate that a member must be seen at a higher frequency. The provider must bill only for the months of service during which the specified contacts are delivered.

The rate of reimbursement for a unit of service is a flat fee of \$461.00 per month with a limit of 12 units per year per member (\$5,532 annual maximum). The Intensive Support Coordinator must meet and document the frequency of contacts defined in the ISP in order to bill for the services.

Intensive Supports Coordination – T2022 U1: \$461.00 per member per month

The following apply to both Support Coordination Services and Intensive Support Coordination Services:

Participant-Direction Options

Support Coordination and Intensive Support Coordination Services are not eligible for delivery through the participant-direction option.

For details on participant-direction, see *Part II Policies and Procedures for COMP/NOW Waiver Program Chapter 1200*.

Incident Reporting Requirements: In addition to the incident reporting requirements for all providers specified in *Part II Policies and Procedures for COMP*, Support Coordination Providers must require Support Coordinators to complete a critical incident report if it is questionable that a service provider completed the necessary report.

Fair Hearings Notification Requirements: Support Coordination Providers must require Support Coordinators to provide notification to participants of their rights to request a Fair Hearing if there are any denials, suspensions, reductions or terminations of waiver services, as a result of Support Coordination action.

Agency Policies and Procedures: Support Coordination Providers must develop written policies and procedures to govern the operations of Support Coordination services in accordance with all requirements for these services. These policies and procedures must address how the agency assures Support Coordination services meet participant and family preferences.

DBHDD Contract/LOA and DBHDD Community Service Standards: Support Coordination Providers must adhere to DBHDD Contract/LOA, all applicable DBHDD Community Service Standards and other DBHDD Standards, including certification by the DBHDD (see *Part II Policies and Procedures for COMP, Chapter 603*).

General Reimbursement Guidelines for Support Coordination and Intensive Support Coordination

General Claims Submission Policy for Ordering, Prescribing, or Referring (OPR) Providers

The Affordable Care Act (ACA) requires physicians and other eligible practitioners who order, prescribe and refer items or services for Medicaid beneficiaries to be enrolled in the Georgia Medicaid Program. As a result, CMS expanded the claim editing requirements in Section 1833(q) of the Social Security Act and the providers' definitions in sections 1861-r and 1842(b)(18)C. Therefore, claims for services that are ordered, prescribed, or referred must indicate who the ordering, prescribing, or referring (OPR) practitioner is. The department will utilize an enrolled OPR provider identification number for this purpose. Any OPR physicians or other eligible practitioners who are NOT already enrolled in Medicaid as participating (i.e., billing) providers must enroll separately as OPR Providers. The National Provider Identifier (NPI) of the OPR Provider must be included on the claim submitted by the participating, i.e., rendering, provider. If the NPI of the OPR Provider noted on the Georgia Medicaid claim is

associated with a provider who is not enrolled in the Georgia Medicaid program, **the claim cannot be paid.**

Effective 4/1/2014, DCH will begin editing claims submitted through the web, EDI and on CMS-1500 forms for the presence of an ordering, referring or prescribing provider as required by program policy. The edit will be informational until 6/1/2014. Effective 6/1/2014, the ordering, prescribing and referring information will become a mandatory field and claims that do not contain the information as required by policy will begin to deny.

For the NEW CMS-1500 claim form:

Enter qualifiers to indicate if the claim has an ordering, referring, or prescribing provider to the left of the dotted line in box 17 (Ordering = DK; Referring = DN or Supervising = DQ).

For claims entered via the web:

Claims headers were updated to accept ordering or referring Provider ID and name for Dental and Institutional claims and the referring provider's name for Professional claims. The claim detail was updated to accept an ordering or referring provider ID and name. Utilize the "ordering" provider field for claims that require a prescribing physician.

For claims transmitted via EDI:

The 837 D, I, and P companion guides were updated to specifically point out the provider loops that capture the rendering, ordering, prescribing, referring and service facility provider information that is now used to transmit OPR information.

The following resources are available for more information:

- Access the department's DCH-i newsletter and FAQs at <http://dch.georgia.gov/publications>
- Search to see if a provider is enrolled at <https://www.mmis.georgia.gov/portal/default.aspx>

Click on "Provider Enrollment/Provider Contract Status." Enter Provider ID or NPI and provider's last name.

CMS 1500 Claim Form

Effective May 1, 2015, the Department will only accept electronic claims. Any paper claims submitted to the fiscal agent for payment will be returned to the provider. Please refer to the Medicaid and PeachCare for Kids Part I Policies and Procedures manual, Section 112, for more information." Providers will be required to use the revised CMS 1500 claim form (version 02/12) for claims. The revised CMS 1500 form contains a number of changes. These changes includes but are not limited to references to ICD-10 codes, identification of Ordering, Prescribing, and Referring providers, and the expansion of number of possible diagnosis codes on a claim.

APPENDIX C

Georgia Families

Rev 07 2017

Rev 10 2018

Georgia Families® (GF) is a statewide program designed to deliver health care services to members of Medicaid, PeachCare for Kids®, and Planning for Healthy Babies® (P4HB) recipients. The program is a partnership between the Department of Community Health (DCH) and private care management organizations (CMOs). By providing a choice of health plans, Georgia Families allows members to select a health care plan that fits their needs.

It is important to note that GF is a full-risk program; this means that the four CMOs licensed in Georgia to participate in GF are responsible and accept full financial risk for providing and authorizing covered services. This also means a greater focus on case and disease management with an emphasis on preventative care to improve individual health outcomes.

The four licensed CMOs:

 Amerigroup Community Care 1-800-454-3730 www.amerigroup.com	 CareSource 1-855-202-1058 www.caresource.com
 Peach State Health Plan 866-874-0633 www.pshpgeorgia.com	 WellCare of Georgia 866-231-1821 www.wellcare.com

Children, parent/caretaker with children, pregnant women and women with breast or cervical cancer on Medicaid, as well as children enrolled in PeachCare for Kids® are eligible to participate in Georgia Families. Additionally, Planning for Healthy Babies® (P4HB) recipients receive services through Georgia Families® (GF). Children in foster care or receiving adoption assistance and certain youths committed to juvenile justice are enrolled in Georgia Families 360°.

APPENDIX C

Georgia Families

Eligibility Categories for Georgia Families:

Included Populations	Excluded Populations
Parent/Caretaker with Children	Aged, Blind and Disabled
Transitional Medicaid	Nursing home
Pregnant Women (Right from the Start Medicaid – RSM)	Long-term care (Waivers, SOURCE)
Children (Right from the Start Medicaid – RSM)	Federally Recognized Indian Tribe
Children (newborn)	Georgia Pediatric Program (GAPP)
Women Eligible Due to Breast and Cervical Cancer	Hospice
PeachCare for Kids®	Children’s Medical Services program
Parent/Caretaker with Children	Medicare Eligible
Children under 19	Supplemental Security Income (SSI) Medicaid
Women’s Health Medicaid (WHM)	Medically Needy
Refugees	Recipients enrolled under group health plans
Planning for Healthy Babies®	Individuals enrolled in a Community Based Alternatives for Youths (CBAY)
Resource Mothers Outreach	

Medicaid and PeachCare for Kids® members will continue to be eligible for the same services they receive through traditional Medicaid and state Value Added Benefits. Members will not have to pay more than they paid for Medicaid co-payments or PeachCare for Kids® premiums. With a focus on health and wellness, the CMOs will provide members with health education and prevention programs giving them the tools needed to live healthier lives. Providers participating in Georgia Families will have the added assistance of the CMOs to educate members about accessing care, referrals to specialists, member benefits, and health and wellness education. **All four CMOs are State-wide.**

The Department of Community Health has contracted with four CMOs to provide these services:

- Amerigroup Community Care
- CareSource
- Peach State Health Plan
- WellCare of Georgia

Members can contact Georgia Families for assistance to determine which program best fits their family’s needs. If members do not select a plan, Georgia Families will select a health plan for them.

Members can visit the Georgia Families Web site at www.georgia-families.com or call 1-800-GA-ENROLL (1-888-423-6765) to speak to a representative who can give them information about the CMOs and the health care providers.

APPENDIX C

Georgia Families

HEALTH CARE PROVIDERS

For information regarding the participating health plans (enrollment, rates, and procedures), please call the numbers listed below.

Prior to providing services, you should contact the member's health plan to verify eligibility, PCP assignment and covered benefits. You should also contact the health plan to check prior authorizations and submit claims.

Amerigroup Community Care	CareSource	Peach State Health Plan	WellCare of Georgia
800-454-3730 (general information) www.amerigroup.com	1-855-202-1058 www.careSource.com/ Georgia Medicaid	866-874-0633 (general information) 866-874-0633 (claims) 800-704-1483 (medical management) www.pshpgeorgia.com	866-231-1821 www.wellcare.com

Registering immunizations with GRITS:

If you are a Vaccine for Children (VFC) provider, please continue to use the GRITS (Georgia Immunization Registry) system for all children, including those in Medicaid and PeachCare for Kids®, fee-for-service, and managed care.

Important tips for the provider to know/do when a member comes in:

Understanding the process for verifying eligibility is now more important than ever. You will need to determine if the patient is eligible for Medicaid/PeachCare for Kids® benefits and if they are enrolled in a Georgia Families health plan. Each plan sets its own medical management and referral processes. Members will have a new identification card and primary care provider assignment.

You may also contact DXC at 1-800-766-4456 (statewide) or www.mmis.georgia.gov for information on a member's health plan.

Use of the Medicaid Management Information System (MMIS) web portal:

The call center and web portal will be able to provide you information about a member's Medicaid eligibility and health plan enrollment. DXC will **not** be able to assist you with benefits, claims processing or prior approvals for members assigned to a Georgia Families health plan. You will need to contact the member's plan directly for this information.

APPENDIX C

Georgia Families

Participating in a Georgia Families' health plan:

Each health plan will assign provider numbers, which will be different from the provider's Medicaid provider number and the numbers assigned by other health plans.

Billing the health plans for services provided:

For members who are in Georgia Families, you should file claims with the member's health plan.

If a claim is submitted to DXC in error:

DXC will deny the claim with a specific denial code. Prior to receiving this denial, you may go ahead and submit the claim to the member's health plan.

Credentialing

Effective August 1, 2015, Georgia's Department of Community Health (DCH) implemented a NCQA certified Centralized Credentialing Verification Process utilizing a Credentialing Verification Organization (CVO). This functionality has been added to the Georgia Medicaid Management Information System (GAMMIS) website (www.MMIS.georgia.gov) and has streamlined the time frame that it takes for a provider to be fully credentialed.

Credentialing and recredentialing services is provided for Medicaid providers enrolled in Georgia Families and/or the Georgia Families 360° program.

This streamlined process results in administrative simplification thereby preventing inconsistencies, as well as the need for a provider to be credentialed or recredentialed multiple times.

The CVO's one-source application process:

- Saves time
- Increases efficiency
- Eliminates duplication of data needed for multiple CMOs
- Shortens the time period for providers to receive credentialing and recredentialing decisions

The CVO will perform primary source verification, check federal and state databases, obtain information from Medicare's Provider Enrollment Chain Ownership System (PECOS), check required medical malpractice insurance, confirm Drug Enforcement Agency (DEA) numbers, etc. A Credentialing Committee will render a decision regarding the provider's credentialing status. Applications that contain all required credentialing and recredentialing materials at the time of submission will receive a decision within 45 calendar days. Incomplete applications that do not contain all required credentialing documents will be returned to the provider with a request to supplement all missing materials. Incomplete applications may result in a delayed credentialing or recredentialing decision. The credentialing decision is provided to the CMOs.

APPENDIX C

Georgia Families

HP provider reps will provide training and assistance as needed. Providers may contact HP for assistance with credentialing and recredentialing by dialing 1-800-766-4456.

Assignment of separate provider numbers by all of the health plans:

Each health plan will assign provider numbers, which will be different from the provider's Medicaid provider number and the numbers assigned by other health plans.

Billing the health plans for services provided:

For members who are in Georgia Families, you should file claims with the member's health plan.

If a claim is submitted to DXC in error:

DXC will deny the claim with a specific denial code. Prior to receiving this denial, you may go ahead and submit the claim to the member's health plan.

Receiving payment:

Claims should be submitted to the member's health plan. Each health plan has its own claims processing and you should consult the health plan about their payment procedures.

Health plans payment of clean claims:

Each health plan (and subcontractors) has its own claims processing and payment cycles. The claims processing and payment timeframes are as follows:

Amerigroup Community Care	CareSource	Peach State Health Plan	WellCare of Georgia
Amerigroup runs claims cycles twice each week (on Monday and Thursday) for clean claims that have been adjudicated. Monday Claims run: Checks mailed on Tuesday. Providers enrolled in ERA/EFT receive the ACH on Thursday.	CareSource runs claims cycles twice each week on Saturdays and Tuesdays for <u>clean</u> claims that have been adjudicated. <u>Pharmacy</u> : Payment cycles for pharmacies is weekly on Wednesdays.	Peach State has two weekly claims payment cycles per week that produces payments for clean claims to providers on Monday and Wednesday. For further information, please refer to the Peach State website, or the Peach State provider manual.	WellCare runs claims payment cycles up to six (6) times each week for clean claims. For further information, please refer to the WellCare website, the WellCare provider manual, or contact Customer Service at 866-231-1821

APPENDIX C

Georgia Families

Thursday Claims run: Checks mailed on Wednesday. Providers enrolled in ERA/EFT receive the ACH on Tuesday. Dental: Checks are mailed weekly on Thursday for clean claims. Vision: Checks are mailed weekly on Wednesday for clean claims (beginning June 7th) Pharmacy: Checks are mailed to pharmacies weekly on Friday (except when a holiday falls on Friday, then mailed the next business day)

How often can a patient change his/her PCP?

Amerigroup Community Care	CareSource	Peach State Health Plan	WellCare of Georgia
Anytime	Members can change their PCP one (1) time per month. However, members can change their PCP at any time under extenuating circumstances such as: • Member requests to be assigned to a family member's PCP • PCP does not provide the covered services a member seeks due to	Within the first 90 days of a member's enrollment, he/she can change PCP monthly. If the member has been with the plan for 90 days or longer, the member can change PCPs once every six months. There are a few exclusions that apply and would warrant an immediate PCP change.	Members can change PCPs for any reason within the first 90 days of their enrollment. After the first 90 days, members may change PCPs once every six months.

APPENDIX C

Georgia Families

	moral or religious objections • PCP moves, retires, etc.		
--	---	--	--

Once the patient requests a PCP change, how long it takes for the new PCP to be assigned:

Amerigroup Community Care	CareSource	Peach State Health Plan	WellCare of Georgia
Next business day	PCP selections are updated in CareSource's systems daily.	PCP changes made before the 24 th day of the month and are effective for the current month. PCP changes made after the 24 th day of the month are effective for the first of the following month.	PCP changes made between the 1st and 10th of the month will go into effect right away. Changes made after the 10th of the month will take effect at the beginning of the next month

PHARMACY

Georgia Families does provide pharmacy benefits to members. Check with the member's health plan about who to call to find out more about enrolling to provide pharmacy benefits, including information about their plans reimbursement rates, specific benefits that are available, including prior approval requirements.

To request information about contracting with the health plans, you can call the CMOs provider enrollment services.

All providers must be enrolled as a Medicaid provider to be eligible to contract with a health plan to provide services to Georgia Families members.

APPENDIX C

Georgia Families

The CMO Pharmacy Benefit Managers (PBM) and the Bin Numbers, Processor Control Numbers and Group Numbers are:

Health Plan	PBM	BIN #	PCN
Amerigroup Community Care	ESI	003858	MA
CareSource	CVS Caremark	004336	MCAIDADV Group: RX0835
Peach State Health Plan	US Script (PBM) Caremark (Claims Processor)	004336	MCAIDADV
WellCare of Georgia	Caremark	004336	MCAIDADV

If a patient does not have an identification card:

Providers can check the enrollment status of Medicaid and PeachCare for Kids® members through DXC by calling 1-800-766-4456 or going to the web portal at www.mmis.georgia.gov. DXC will let you know if the member is eligible for services and the health plan they are enrolled in. You can contact the member's health plan to get the member's identification number.

Use of the member's Medicaid or PeachCare for Kids® identification number to file a pharmacy claim:

Amerigroup Community Care	CareSource	Peach State Health Plan	WellCare of Georgia
No, you will need the member's health plan ID number	Yes, you may also use the health plan ID number.	Yes	Yes, you may also use the WellCare subscriber ID

Health plans preferred drug list, prior authorization criteria, benefit design, and reimbursement rates:

Each health plan sets their own procedures, including preferred drug list, prior authorization criteria, benefit design, and reimbursement rates.

Will Medicaid cover prescriptions for members that the health plans do not?

No, Medicaid will not provide a "wrap-around" benefit for medications not covered or approved by the health plan. Each health plan will set its own processes for determining medical necessity and appeals.

Limitations on Billing of Case Management

Definition

Case Management Services means services which will assist Medicaid eligible individuals to gain access to needed medical, social, educational and other services. Such services include but are not limited to, the following:

- Assessment of eligible individual to determine service needs, including activities that focus on needs identification, to determine the need for any medical educational, social or other services.
- Development of a specific care plan based on the information collected through assessment; that specifies the goals and actions to address the medical, social, educational and other services needed by eligible individuals.
- Referral and related activities to help and individual obtain needed services.
- Monitoring and follow-up activities, including activities and contacts that are necessary to ensure the care plan is effectively implemented and adequately addressing the needs of the individual.

Duplication of Case Management Services

Federal policy and the Department of Community Health (DCH) prohibit the reimbursement for case management services to more than one agency or Medicaid provider that renders case management services to an individual. This policy is set forth according the federal Requirements and Limits Applicable to Specific Services defined in the State Medicaid Manual, section 4302.

It is the responsibility of the case manager to ensure that the member is not receiving case management services from any other agency. The case manager must obtain from the member information regarding any and all other services that he/she may be receiving prior to enrolling the member in a case management program. If the case manager should learn that the member is enrolled in another case management program, the case manager is advised not to render any case management services until it is verified that his/her case management services are primary. This may require termination of the member from another case management provider before case management from the new provider can be billed. It is the case manager's responsibility to advise the member of the various case management choices available to the member and to allow the member to make an affirmative choice among them.

Basis for Reimbursement

DCH will reimburse only one provider agency for case management services. The Department has established the case management hierarchy below to define which case management is primary and will be reimbursed. The Department's billing system has been modified to include edits to ensure the hierarchy is followed in the case of billing from more than one case management provider. The case management provider highest on the hierarchy will be reimbursed if 2 case managers should submit claims for the same month of service.

APPENDIX D

- 1) COS 830 - (Case Management Organization – CMO)
- 2) COS 851 - (SOURCE Case Management)
COS 930 - (SOURCE Case Management)
- 3) COS 660 - (Independent Care Waiver)

- 10) COS 790 - (Rehab Services/DSPS)
- 11) COS 960 - (Children Intervention School Service)

NOTES: Persons enrolled in hospice have case managers who manage all of their care and may not receive case management from any other program while enrolled in hospice. The Department's hospice lock-in system will automatically cause any other claims for case management to be denied.

APPENDIX E

Georgia Families 360⁰ SM,

Information for Providers Serving Medicaid Members in the Georgia Families 360⁰ SM Program

Georgia Families 360⁰ SM, the state's (took out "new") managed care program for children, youth, and young adults in Foster Care, children and youth receiving Adoption Assistance, as well as select youth in the juvenile justice system. launched Monday, March 3, 2014. Amerigroup Community Care is the single Care Management Organization (CMO) that will be managing this population.

Amerigroup is responsible, through its provider network, for coordinating all DFCS, DJJ required assessments and medically necessary services for children, youth and young adults who are eligible to participate in the Georgia Families 360⁰ SM Program. Amerigroup will coordinate all medical/dental/trauma assessments for youth upon entry into foster care or juvenile justice (and as required periodically).

Georgia Families 360⁰ SM Every member in Georgia Families 360⁰ is assigned a Care Coordinator who works closely with them to ensure access to care and ensure that appropriate, timely, and trauma informed care is provided for acute conditions as well as ongoing preventive care. This ensures that all medical, dental, and behavioral health issues are addressed. Members also have a medical and dental home to promote consistency and continuity of care. The medical and dental homes coordinate care and serve as a place where the child is known over time by providers who can provide holistic care. DFCS, DJJ, foster parents, adoptive parents, and other caregivers are involved in the ongoing health care plans to ensure that the physical and behavioral health needs of these populations are met.

Electronic Health Records (EHRs) are being used to enhance effective delivery of care. The EHRs can be accessed by Amerigroup, physicians in the Amerigroup provider network, and DCH sister agencies, including the DFCS, regardless of where the child lives, even if the child experiences multiple placements. Ombudsman and advocacy staff are in place at both DCH and Amerigroup to support caregivers and members, assisting them in navigating the health care system. Additionally, medication management programs are in place to focus on appropriate monitoring of the use of psychotropic medications, to include ADD/ADHD as well as other behavioral health prescribed medications.

Providers can obtain additional information by contacting the Provider Service Line at 1-800-454-3730 or by contacting their Provider Relations representative.

To learn more about DCH and its dedication to A Healthy Georgia, visit www.dch.georgia.gov

Version 2.1.17

Service Change / Technical Assistance Request **Instructions Guide**

Purpose of the Service Change/Technical Assistance Request:

- Designed to provide documentation for review by the DBHDD Field Office to determine the need for an increase in services or significant change in the ISP necessitating change to the service authorization (PA).

When to Use this Document:

- If a significant service change is requested during the ISP plan year.
- If there is a significant change in health, condition, behavior, or family circumstance that might affect the service needs of the individual.

APPENDIX G

Completing the Request:

Immediate/Urgent Request: *to be used only when delay of service change (over 14 days) presents a health or safety risk to the individual.*

I. Indicate type of request

- _____ Service Change
- _____ Technical Assistance Only (*use when the individual has experienced a change in condition but it's not known whether a change in service is needed*)

II. Indicate reason for the request

Condition Change
Examples: Hospitalization, condition or functional decline, increase in challenging behavior
Change in Circumstance
Examples: Family member health decline, work schedule change, increase in other caregiving responsibilities, or move to a different residence or setting

III. Describe the Change in Condition or Circumstance in Measurable Terms:

Examples: Change in Condition

Mother describes John's increase in self-injurious behavior by reporting that prior to last month he occasionally (monthly) engaged in _____ but the behavior has increased to several times per week over the last month.

John was admitted to Phoebe Putney Hospital ten days ago with a new diagnosis of ----. While in the hospital he experienced functional decline. Was able to walk without assistance prior to hospitalization but now requires stand by assistance. Two falls in the last two days following hospital discharge.

Change in Circumstance

John's mother had been working part time until noon in the school that he attends but has accepted a new fulltime position in the community. Needs assistance with oversight and after school activities in the community, Monday through Friday 3pm – 6:30 pm.

John's mother and primary source of support requires elective surgery and needs to schedule. Surgeon predicts a six-week recovery period during which she is unable to provide support with personal care needs before CAG in the morning and during the hours of 3 – 6:30 pm when John's father returns home. Request is for eight weeks of CLS in order to provide a little time for any delay in complete recovery.

APPENDIX G

IV. Describe the nature of the urgent need

Example: caregiver currently unable to provide support, hospitalization with resulting need for nursing services, etc.

V. Other resources or referrals that may be available now or in the future

Example: John's mother is expected to resume natural support in eight weeks. Plan to re-evaluate the need in four (4) weeks to determine how she is recovering.

VI. Service Request

Example: John's mother requests CLS assistance 2 hours a.m. and 3.5 hours p.m. M-F for eight (8) weeks totaling 22 units daily/880 units CLS.

Goal(s) related to request for a new service

1. John will attend the center that he enjoys M-F having been coached in person care tasks before leaving for the center.
2. John will work on cooking and laundry skills in the afternoon M-F in order to be as helpful as he would like to be during his mother's recovery.

VII. Signatures for Submission of Request

Note: any request for urgent or immediate authorization must be reviewed and approved by the support coordination/intensive support coordination supervisor prior to submission.

VIII. Outcome of Decision

	Approval without additional assessment <i>Indicates authorization to begin services with the date of signature by the DBHDD Field Office.</i> <i>Amend the ISP immediately to reflect change in service.</i>
	Requires assessment prior to approval <i>Indicates that the submitter must wait for the results of clinical evaluation prior to authorizing the requested services.</i> <i>Do not amend the ISP pending authorization by the field office.</i>

APPENDIX G

	Temporary approval pending additional assessment <i>Indicates authorization to begin services with the date of signature by the DBHDD Field Office but only for the period noted below.</i>
	Approval of increased services with start date: _____ Approval end date _____
	Denial
	The request does not clearly describe why the service change is needed.
	<i>Indicates insufficient information provided about the change in need.</i>
	The change in condition/circumstance is not described in measureable terms. <i>Indicates lack of detail in the description. Field office should indicate specific unanswered questions.</i>
	Based on clinician review, the service change is not justified <i>Sufficient information was provided, but a Field Office clinician determined the need was not justified.</i>
	Denial Notice sent to individual/representative _____(date)

IX. Increase or change (designate service name/current amount/approved amount)

Field office signature indicates review and outcome. First Reviewer may be the I&E Manager, clinical staff or other. Also requires signature by the Regional Services Administrator or designee. Approvals are sent for PA update. Denials are returned to the Support Coordination Agency with notification to the family, next-of-kin, or guardian.

Include the following documentation to expedite the request:

PDF or hard copy of the most current ISP

Fee schedule/registration cost/price quotes representing the requested increase *if applicable*

Physician order if service request is for any skilled service, e.g. PT, OT, SLP, nursing.

Include the following documentation to expedite the request:

PDF or hard copy of the most current ISP

Fee schedule/registration cost/price quotes representing the requested increase *if applicable*

Physician order if service request is for any skilled service, e.g. PT, OT, SLP, nursing.

Physician order if required for medical supplies or equipment (excludes those items identified in 2802.1 of the Specialized Medical Supplies policy)
